30 days to a healthier you

You are about to embark on a 30-day adventure. Not only will you be thinner at the end of your journey, but you will have also shed old bad habits and replaced them with new healthy ones.

Prevention's Nutrition Guide and Weight Loss Planner will be your travel companion throughout your journey, to carry along wherever you go. It provides you with a low-fat, low-calorie meal plan that's packed with nutrient-dense foods, including lots of fiber-rich good carbs. (We also tell you how you can enjoy heart-healthy, good fats too—in foods such as nuts, fatty fish, and certain oils.)

But that's not all: **We offer an exclusive, all-in-one fitness plan** that will strengthen your body and heart and help you shed those extra pounds.

And the icing on the cake? The planner itself. Research shows that people who keep a food diary are more likely to lose weight and keep it off, so we've included 30 pages to help you track and meet your nutrition and exercise goals.

This booklet will keep you on course to help you lose weight, grow stronger, and become a healthier, happier you. Enjoy the trip!

For your plate

Eat great, lose weight

Here's where your adventure begins: with the most nutritious and easy-to-follow meal plan you'll find anywhere. Our Eat-Great-Lose-Weight meal plan consists of just 10 steps that you can start following today. Each day's menu delivers 1,500 calories, a gradual weight loss diet for most women. Our plan is composed of six minimeals a day of about 250 calories each. Not only does this eating style prevent dips in energy, it also appears to help you burn calories better as you grow older. For women over 50, this could prevent a weight gain of up to 6 pounds a year. (If you need more than 1,500 calories a day, double the portions for one or more minimeals.) We've provided two sample menus on page 7 to get you started.

Tomatoes add color and nutrition.

step one Eat nine servings of vegetables and fruits every day Veggies and fruits are the foundation of this diet. You'll be eating nine ½-cup servings of a variety of fruits and veggies a day. They provide lots of nutrients and fiber, but very few calories.

calories out of your body before they have a chance to land on your hips. Aim for 25 to 35 g a day. By eating 30 g a day, your body will absorb almost 120 fewer calories a day, adding up to a 13-pound weight loss in a year!

step three Eat two or three calcium-rich foods every day Research has shown that people who get the most calcium from food (about 1,300 mg a day) reduce their chances of becoming overweight by an astonishing 80% compared to those who eat only 255 mg daily. High calcium choices include skim or

low-fat milk, yogurt, and cheese, or calcium-fortified orange and grapefruit juices and soymilks.

Greens and veggies are key.

step two Eat three to six whole grain foods every day Whole grain foods are loaded with fiber, which whisks

step four Eat beans five or more times a week Beans are the highest-fiber foods you can find, with the single exception of breakfast cereals made with wheat bran. Fiber helps absorb calories and keeps you feeling fuller, longer.

step five Eat nuts five times a week Nuts contain health-boosting monounsaturated "good" fats. The key is not to eat too many; because they're so high in calories, you could easily gain weight. To avoid temptation, we suggest keeping a jar of chopped nuts in your fridge so they're a little harder to reach on a whim.

step six Eat fish twice a week Choose low-mercury fish such as sardines,

herring, and wild salmon, which are all high in heart-healthy omega-3 fatty acids. If you are a vegetarian or dislike fish, you can get a plant version of

If you don't like fish, get your omega-3s from enriched eggs.

omega-3 fat by using canola oil for cooking and flaxseed oil for salad dressings. You can also eat omega-3-enriched eggs.

step seven Drink eight glasses of water every day, plus a cup or more of tea Every cell in your body needs water to function. Drinking lots of water helps you feel full too. And every cup of tea provides a strong infusion of antioxidants!

What's in a Serving?

■ Vegetables and Fruits

one serving is equal to:

- 1 medium piece of fruit
- ½ c chopped fruit
- ½ c cooked or raw veggie
- 1 c raw green leaves
- ¾ c vegetable or fruit juice

■ Whole Grains

one serving is equal to:

- 1 slice whole wheat bread
- ½ c brown rice or bulgur
- ½ c whole wheat pasta

■ High-Calcium Foods

one serving is equal to:

- 1 c fat-free or 1% milk
- 1 c fat-free or low-fat yogurt

- 1 c calcium-fortified orange juice
- 1 oz reduced-fat cheese

■ Beans

one serving is equal to:

- ½ c cooked dried beans/lentils

■ Nuts

one serving is equal to:

- 2 Tbsp chopped

■ Fish

one serving is equal to:

- 3 oz cooked

How Many Servings?

■ Daily Servings

Vegetables and Fruits

9 servings (5 veggie/4 fruit)

Whole Grains

3–6 servings

High-Calcium Foods

2–3 servings

Water/Tea

8 glasses water and 1+ cup tea

■ Weekly Servings

Beans

5+ servings

Nuts

5 servings

Fish

2+ servings

■ Multivitamin/Mineral Supplement

100% DV for most nutrients a day

Calcium

Under 50 years old: 500 mg a day

Over 50 years old: 1,000 mg a day

Vitamin E

100–400 IU a day

Vitamin C

100–500 mg a day

Maximum Fat Allowance

Calories	Fat Grams
1,250	35
1,500	42
1,750	49
2,000	56
2,250	63

fat—you must first find the maximum fat allowance for your calorie level.

Once you know your fat budget, see whether you are staying within the bounds by adding up the grams of fat for all the food that you eat in a day.

step nine Take some sensible nutrition insurance Besides your fabulous diet, take a moderate multivitamin/mineral supplement, plus 100 to 400 international units (IU) of vitamin E and 100 to 500 mg of vitamin C. On days when you eat only two calcium-rich foods, take 500 mg of calcium if you're under 50 years old; take 1,000 mg of calcium (divided into two separate doses of 500 mg each) if you're 50 or older.

step ten Consider these options

carefully These choices are up to you:

■ **Meat and Poultry:** Up to 3 cooked oz (the size of a deck of cards) per day.

■ **Eggs:** If you have diabetes or high cholesterol or are overweight, you can eat up to four eggs a week; if you have none of these conditions, up to seven eggs a week is okay.

■ **Alcohol:** Up to one drink a day for women, and two drinks for men.

■ **Sweets:** Reserve for special occasions.

step eight

Keep your fat budget To stay within a healthy fat budget—25% of calories from

* Sample Menu 1

■ Breakfast

½ whole wheat English muffin
1 teaspoon trans-free margarine
1 poached or hard-cooked egg
1 pear

■ Midmorning Snack

½ cup low-fat vanilla yogurt
½ cup low-fat granola

■ Lunch

2 slices whole wheat bread with
2 oz reduced-fat mozzarella cheese
1 roasted bell pepper (packed in water)

basil leaves

■ Midafternoon Snack

¼ cup hummus
½ cup cucumber slices

■ Dinner

3 oz poached salmon
1 cup brown rice
½ cup no-salt-added stewed tomatoes
1 cup steamed kale

■ Evening Snack

½ cup calcium-fortified orange juice
1 banana

■ Day's Totals

Calories: 1,506
Fat: 38 g
Saturated fat: 10 g
Fiber: 21 g
Sodium: 1,337 mg

* Sample Menu 2

■ Breakfast

¾ cup hot whole wheat cereal
½ cup frozen blueberries, thawed
1 cup fat-free milk

■ Midmorning Snack

1 slice toasted raisin bread
1 tablespoon natural peanut butter

■ Lunch

1 small bean burrito
8 grape tomatoes, halved and tossed with 2 oz crumbled reduced-fat feta cheese

■ Midafternoon Snack

1 serving Papaya Power Shake—In blender, whirl the following together until smooth: 1 cup papaya (peeled, seeded, and cut up), 1 cup lowfat plain yogurt, ½ banana, ½ cup pineapple chunks, ½ teaspoon dried mint, and 4 slightly crushed ice cubes. (You can also replace the papaya with jarred mango spears.)

■ Dinner

2 oz roast chicken breast
1 cup mashed butternut squash
1 cup brussels sprouts
½ cup corn kernels mixed with
½ cup cooked barley
2 teaspoons canola oil

■ Evening Snack

1 extra large baked apple with 2 teaspoons honey or brown sugar

■ Day's Totals

Calories: 1,529
Fat: 45 g
Saturated fat: 15 g
Fiber: 30 g
Sodium: 2,609 mg

For your body

The ultimate fat-blasting workout

Starting an exercise program isn't always as simple as making the decision and just doing it. What if you don't know where to begin? With this fat-blasting workout, we've taken all of the guesswork out of your workouts by showing you exactly which exercises to do and how to do them safely. To make things even easier, we've included a schedule to follow. All you need are some weight machines or dumbbells (we used 5- and 10-pound sets) and 45 minutes, 6 days a week. Here's the plan that'll help you get started today.

■ **Two days a week**, do two sets of exercises for your upper body (see "Upper Body Circuit" on page 9).

■ **Another 2 days**, do the same for your lower body (see "Lower Body Circuit" on page 11).

■ **Between sets**, do 2 ½ minutes of aerobic activity of your choice—stationary bicycling, treadmill walking, a snippet from an exercise video, marching in place, anything you like.

■ **Two days a week**, do 45 minutes of just aerobic activity (see "Your Aerobic Options" on page 15 for more ideas).

■ **An example of putting it all together:** On an upper-body day, begin with one set of chest presses, then some type of aerobic activity for 2 ½ minutes. After doing a second set of chest presses and another 2 ½ minutes of aerobics, move on to the next exercise. Continue this pattern until you have completed two sets of 10 to 12 repetitions for each exercise. Another day, repeat the same routine but use the lower body circuit.

Upper Body Circuit

CHEST PRESS

Lying on a bench, hold the dumbbells end to end just above chest height, with your elbows pointing out and toward the floor. Press the dumbbells up, extending your arms. Hold, then lower.

BICEPS CURL

Hold the dumbbells at your sides, palms facing forward. Keeping your elbows at your sides, lift the dumbbells toward your chest. Hold, then lower.

SHOULDER PRESS

Start with the dumbbells at shoulder height, palms facing in. Press the dumbbells straight up overhead, then lower.

Always lift in a slow, controlled manner as you lower. Inhale as you bring the

BENT-OVER ROW

Place your right knee and hand on a bench, keeping your back flat. Holding a dumbbell in your left hand, let your arm hang straight down with the palm facing the bench. Pull the dumbbell up toward your chest. Hold, then lower. Repeat with your other side.

LYING TRICEPS EXTENSION

Lying on a mat, hold the dumbbells with your palms facing each other. Start with your arms extended upward and angled back about 30 degrees toward your head. Bending at the elbows, slowly lower the weights to either side of your head. Don't move your upper arms. Hold, then slowly raise.

Lower Body Circuit

counting 1-2-3 as you lift and 1-2-3 weight down, and exhale as you push it up.

OPPOSITE ARM AND LEG RAISE

Get down on your hands and knees. Slowly raise and straighten your left arm and right leg off the floor as high as is comfortable, but don't arch your back. Hold, then lower. Repeat with your right arm and left leg.

LUNGE

Standing with your feet together, take one big step back with your right leg. Plant your right foot, then slowly lower your right knee toward the floor. Your left knee should be at a 90-degree angle. Push off with your right foot, then return to the starting position. Repeat with your left leg. (To get more out of this exercise, hold dumbbells.)

STEP-UP

Using an aerobic step or regular step and holding dumbbells, step up with your left foot, followed by your right, so that both feet are on the step. Then step down with the right foot, followed by the left. Repeat, starting with the right foot.

HALF SQUAT

Stand in front of a chair with no armrests. Hold the dumbbells down by your sides, with your palms facing in. Keeping your back straight, bend at the knees and hips as though you are sitting down. (Don't let your knees move forward over your toes.) Stop just shy of sitting, then stand back up.

ABDOMINAL CRUNCH

Lie on your back with your knees bent and your feet flat on the floor. Place your hands loosely behind your head. Slowly curl your shoulders about 30 degrees off the floor. Hold, then lower.

Double-Duty Ab Blasters

These moves work the upper, lower, and oblique muscles quickly and easily. Do two sets of 10 to 12 repetitions (to each side, when alternating) 3 days a week.

FLOOR SIDE BEND

Lie down with your knees bent and your feet flat on the floor. Raise your head and shoulders about 30 degrees. Keeping your upper body off the floor, bend sideways at the waist, bringing your left elbow toward your right hip. Return to center, then bend to the left. Return to center, lower, and repeat.

BICYCLE CRUNCH

Lie face-up on the floor, legs extended, hands loosely behind your head. Slowly raise your head and shoulders off the floor. At the same time, bring your left knee in toward your chest, and lift your right leg off the floor. Hold, then lower and switch legs without letting them touch the floor.

Bonus Belly Busters

To further work your abdominal muscles and gain overall strength, we've included the "2-in-1" toning exercises for you below. These moves work the upper and lower body muscles simultaneously, so your abs get a mini-workout. Do two sets of 10 to 12 repetitions twice a week.

ARM/LEG PRESS BACK

Stand alongside a chair (you can use the back for balance), holding a dumbbell in your left hand. Start with your left leg bent so that your thigh is parallel to the floor. Your left arm should form a 90-degree angle, with your elbow by your side. Squeeze your butt, and extend your left leg behind you. Simultaneously straighten your left arm behind you. Hold, return to the starting position, and repeat. Then switch to the right arm and leg.

SQUAT SHOULDER PRESS

Stand with your legs a little wider than shoulder-width apart and your toes pointing out slightly. Holding dumbbells, position your arms up and out so that your elbows are at shoulder level, your forearms and upper arms form a 90-degree angle, and your hands are at about ear level, palms facing in. Bend your knees, and sit back into a squat (keep your knees from jutting past your toes). Simultaneously press the dumbbells overhead. Pause, then return to the starting position.

Your Aerobic Options

Looking for the perfect companion to our fat-blasting strength training workout? Try one (or more!) of the activities listed below. (Note: These figures are based on a 150-pound woman. If you weigh more, you'll burn more calories. If you weigh less, you'll burn fewer.)

Exercise	Calories burned per half-hour (unless otherwise noted)
Aerobics classes and videos	228
Ballroom dancing	105
Bicycling	130–145 (depending on speed and terrain)
Digging	258
Elliptical training	250–300 (per hour)
Hiking	250
Hoeing	186
Jogging and treadmill running	102 (per mile)
Jumping rope	110–130 (per 10-minute session)
Mowing	228
Planting seedlings	144
Power walking	198–250 (per mile)
Raking	111
Rowing machine	240–360
Spinning	535 (per 45-minute class)
Stationary cycling	130–330
Stepping or stair-climbing machine	250–350
Swimming	249–351 (depending on stroke and speed)
Tennis, highly competitive match	237
Walking	100 (per mile)
Water aerobics	200–250

Track your progress

Write your own
success story

On the following pages, you'll find 30 days' worth of handy checklists to follow your daily diet and exercise accomplishments. This planner will serve not only as a daily reminder of your weight loss goals, but also as a record of your day-to-day triumphs and long-term progress. Good luck!

Nutrition Checklist

Daily Servings

- 5 vegetables
- 4 fruits
- 3–6 whole grains
- 2–3 high-calcium foods
- 8 glasses of water
- 1+ cup of tea

Weekly Servings

- 5+ beans
- 5 nuts
- 2 fish

Daily Supplement Needs

- * Multivitamin/mineral:
(100% DV for most nutrients)
- * Vitamin C: (100–500 mg)
- * Vitamin E: (100–400 IU)
- * Calcium (Under age 50: 500 mg; over age 50: 1,000 mg)

- 2 fish

Daily Supplement Needs

- * Multivitamin/mineral:
(100% DV for most nutrients)
- * Vitamin C: (100-500 mg)
- * Vitamin E: (100-400 IU)
- * Calcium (Under age 50: 500 mg; over age 50: 1,000 mg)

for your Body

Find fun exercise Investigate sports and hobbies that enhance your activity level. Backpacking, mountain biking, kayaking, even bowling can all burn calories, but they don't feel like workouts.

Nutrition Checklist

Daily Servings

- 5 vegetables
- 4 fruits
- 3-6 whole grains
- 2-3 high-calcium foods
- 8 glasses of water
- 1+ cup of tea

Weekly Servings

- 5+ beans
- 5 nuts
- 2 fish

Daily Supplement Needs

- * Multivitamin/mineral:
(100% DV for most nutrients)
- * Vitamin C: (100-500 mg)
- * Vitamin E: (100-400 IU)
- * Calcium (Under age 50: 500 mg; over age 50: 1,000 mg)
