Screening Questions	Yes	No
Are you currently in isolation for a recent COVID infection? - *If yes, you cannot receive vaccine while you are under isolation. Please reschedule after you are off isolation.*	☐	☐
Have you had a new onset of fever, chills, cough, shortness of breath, difficulty breathing, fatigue, muscle or body aches, new loss of taste or smell, sore throat, nausea, vomiting, or diarrhea, or are you otherwise not feeling well? - *If yes, you have symptoms that could be consistent with COVID-19. Please obtain testing before receiving your vaccination.*	☐	☐

COVID-19 Vaccine Registration, Screening, Acknowledgement and Consent

Do you have a history of reactions such an immediate rash or anaphylaxis to any mRNA vaccine components? - *If yes, you should not receive this vaccination. People with any prior allergic reactions to vaccine ingredients likely have increased risk of severe allergic reactions. Please consider discussing with your primary care physician or allergist prior to vaccination.*	☐	☐
Have you received another vaccine within the last two weeks? - *If yes, it is not recommended that you receive vaccination. Please schedule after that time period.*	☐	☐

Acknowledgement and Consent

I understand that the COVID-19 vaccine has been authorized for administration by the U.S. Food and Drug Administration under an Emergency Use Authorization ("EUA"). This product has not been approved or licensed by the FDA, but has been authorized for emergency use by the FDA under an EUA to prevent COVID-19 for use in individuals 16 years of age or older. This vaccine may not protect all vaccine recipients. I have been provided with the FDA's required EUA Patient Fact Sheet outlining the significant known and potential side effects and benefits of the COVID-19 vaccine. I understand that given its development process, all potential side effects of the vaccine may not be known at this time, and that there is currently no approved alternative to prevent COVID-19.

I further understand that the full vaccine course consists of two separate injections, 21 days apart, and that as part of the vaccination process I will be required to remain in the vaccine administration area for up to 30 minutes following administration so that I may be monitored for any potential adverse reactions. [Life threatening allergic reactions to vaccines are very rare. Signs of a serious allergic reaction include shortness of breath, hoarseness, wheezing hives, paleness, weakness, elevated heart rate and severe dizziness. These symptoms may occur within a few minutes, or up to 48 hours after the vaccination. If you are to experience any of these symptoms, you contact a healthcare provider immediately.] Additionally, I authorize Cary Adult Medicine personnel to implement the necessary medical interventions should I experience an adverse reaction.

I authorize Cary Adult Medicine to disclose information regarding my vaccination status to my Primary Care Provider and to State vaccine registries or as otherwise permitted or required by law, consistent with Notice of Privacy Practices. I give permission for Cary Adult Medicine to document the administration of the vaccine in my medical record. I acknowledge the HIPAA privacy practices and have been offered a copy.

I understand the information provided and have the opportunity to ask questions and receive answers to my satisfaction before receiving the vaccine. I further understand and acknowledge that receipt of the COVID-19 vaccine is fully voluntary, and by my signature below I acknowledge the risks and benefits of COVID-19 immunization and agree to receive the vaccine.
